Health Profile 2017

Health in summary
The health of people in Barnet is generally better than the England average. About 17% (12,600) of children live in low income families. Life expectancy for both men and women is higher than the England average.

Health inequalities
Life expectancy is 7.3 years lower for men and 5.0 years lower for women in the most deprived areas of Barnet than in the least deprived areas.

Child health
In Year 6, 19.6% (714) of children are classified as obese. The rate of alcohol-specific hospital stays among those under 18 is 22*, better than the average for England. This represents 20 stays per year. Levels of teenage pregnancy, GCSE attainment, breastfeeding initiation and smoking at time of delivery are better than the England average.

Adult health
The rate of alcohol-related harm hospital stays is 488*, better than the average for England. This represents 1,598 stays per year. The rate of self-harm hospital stays is 103*, better than the average for England. This represents 399 stays per year. The rate of smoking related deaths is 205*, better than the average for England. This represents 353 deaths per year. Estimated levels of adult excess weight are better than the England average. Rates of sexually transmitted infections and TB are worse than average. Rates of hip fractures and people killed and seriously injured on roads are better than average. Rates of violent crime, long term unemployment, early deaths from cardiovascular diseases and early deaths from cancer are better than average.

Local priorities
Priorities in Barnet include environmental planning, early years, mental health and wellbeing, encouraging healthy lifestyles and self care, empowering the community and voluntary sector and care closer to home. For more information see www.barnet.gov.uk

* rate per 100,000 population
The age profile and table present demographic information for the residents of the area and England. They include a 2014-based population projection (to 2020), the percentage of people from an ethnic minority group (Annual Population Survey, October 2014 to September 2015) and the dependency ratio.

The dependency ratio estimates the number of dependants in an area by comparing the number of people considered less likely to be working (children aged under 16 and those of state pension age or above) with the working age population. A high ratio suggests the area might want to commission a greater level of services for older or younger people than those areas with a low ratio.

The map shows differences in deprivation in this area based on national comparisons, using national quintiles (fifths) of the Index of Multiple Deprivation 2015 (IMD 2015), shown by lower super output area. The darkest coloured areas are some of the most deprived neighbourhoods in England.

This chart shows the percentage of the population who live in areas at each level of deprivation.
Life expectancy: inequalities in this local authority

The charts show life expectancy for men and women in this local authority for 2013-15. The local authority is divided into local deciles (tenths) by deprivation (IMD 2015), from the most deprived decile on the left of the chart to the least deprived decile on the right. The steepness of the slope represents the inequality in life expectancy that is related to deprivation in this local area. If there was no inequality in life expectancy the line would be horizontal.

Life expectancy gap for men: 7.3 years

Life expectancy gap for women: 5.0 years

Health inequalities: changes over time

These charts provide a comparison of the changes in death rates in people under 75 (early deaths) between this area and England. Early deaths from all causes also show the differences between the most and least deprived local quintile in this area. Data from 2010-12 onwards have been revised to use IMD 2015 to define local deprivation quintiles (fifths), all prior time points use IMD 2010. In doing this, areas are grouped into deprivation quintiles using the Index of Multiple Deprivation which most closely aligns with time period of the data. This provides a more accurate way of discriminating changes between similarly deprived areas over time.

Data points are the midpoints of three year averages of annual rates, for example 2005 represents the period 2004 to 2006. Where data are missing for local least or most deprived, the value could not be calculated as the number of cases is too small.

The chart below shows how the health of people in this area compares with the rest of England. This area’s result for each indicator is shown as a circle. The average rate for England is shown by the black line, which is always at the centre of the chart. The range of results for all local areas in England is shown as a grey bar. A red circle means that this area is significantly worse than England for that indicator; a green circle may still indicate an important public health problem.

### Indicator notes

### Indicator values

#### Deprivation score (IMD 2015)
- **England worst**: 17.8
- **25th percentile**: 21.8
- **75th percentile**: 42.0

#### Hospital stays for self-harm†
- **England worst**: 12,580
- **25th percentile**: 17.4
- **75th percentile**: 20.1

#### Under-18 conceptions
- **England worst**: 2,327
- **25th percentile**: 68.7
- **75th percentile**: 57.8

#### Violent crime (violence offences)
- **England worst**: 5,849
- **25th percentile**: 15.6
- **75th percentile**: 17.2

#### Suicide rate
- **England worst**: 20.1
- **25th percentile**: 52.4
- **75th percentile**: 64.8

#### Record of diabetes
- **England worst**: 635.3
- **25th percentile**: 137.6
- **75th percentile**: 1,163

#### Under-75 mortality rate: cancer
- **England worst**: 103.2
- **25th percentile**: 26.0
- **75th percentile**: 86.7

#### Record of violence against the person crimes
- **England worst**: 10.6
- **25th percentile**: 2.7
- **75th percentile**: 20.8

#### Mortality rate from suicide and injury of undetermined intent per 100,000 population (aged 10 and over)
- **England worst**: 995.8
- **25th percentile**: 121.3
- **75th percentile**: 205.2

#### Admissions involving an alcohol-related primary diagnosis
- **England worst**: 655
- **25th percentile**: 2.7
- **75th percentile**: 3.7

#### Under-75 mortality rate: cardiovascular
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at birth (Female)
- **England worst**: 85.0
- **25th percentile**: 79.4
- **75th percentile**: 87.9

#### Under-75 mortality rate: respiratory
- **England worst**: 63.5
- **25th percentile**: 20.1
- **75th percentile**: 52.4

#### Life expectancy at birth (Male)
- **England worst**: 83.4
- **25th percentile**: 81.9
- **75th percentile**: 84.7

#### Under-school children (Year 6)
- **England worst**: 72
- **25th percentile**: 11.5
- **75th percentile**: 20.8

#### Recorded hospital stays for self-harm†
- **England worst**: 118
- **25th percentile**: 0.8
- **75th percentile**: 0.9

#### Recorded hospital stays for alcohol-specific harm†
- **England worst**: 2,283
- **25th percentile**: 286
- **75th percentile**: 488

#### Eligible homeless people not in priority need, crude rate per 1,000 households
- **England worst**: 272
- **25th percentile**: 95
- **75th percentile**: 205

#### Directly age standardised rate of emergency admissions, per 100,000 population aged 65 and over
- **England worst**: 4,258
- **25th percentile**: 85.3
- **75th percentile**: 286

#### Under-18 conceptions
- **England worst**: 714
- **25th percentile**: 19.6
- **75th percentile**: 28.5

#### Recorded diagnoses of diabetes
- **England worst**: 655
- **25th percentile**: 2.7
- **75th percentile**: 3.7

#### Eligible homeless people not in priority need, crude rate per 1,000 households
- **England worst**: 4,258
- **25th percentile**: 85.3
- **75th percentile**: 286

#### Directly age standardised rate of emergency admissions, per 100,000 population aged 65 and over
- **England worst**: 25.1
- **25th percentile**: 7.2
- **75th percentile**: 20.1

#### Suicide rate
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at age 80
- **England worst**: 48.0
- **25th percentile**: 30.0
- **75th percentile**: 42.0

#### Recorded hospital stays for alcohol-related harm†
- **England worst**: 2,283
- **25th percentile**: 286
- **75th percentile**: 488

#### Life expectancy at age 90
- **England worst**: 39.2
- **25th percentile**: 26.0
- **75th percentile**: 57.8

#### Recorded hospital stays for alcohol-related harm†
- **England worst**: 2,283
- **25th percentile**: 286
- **75th percentile**: 488

#### Life expectancy at age 95
- **England worst**: 37.4
- **25th percentile**: 22.4
- **75th percentile**: 121.3

#### Recorded hospital stays for alcohol-specific harm†
- **England worst**: 2,283
- **25th percentile**: 286
- **75th percentile**: 488

#### Under-school children (Year 6)
- **England worst**: 72
- **25th percentile**: 11.5
- **75th percentile**: 20.8

#### Eligible homeless people not in priority need, crude rate per 1,000 households
- **England worst**: 272
- **25th percentile**: 95
- **75th percentile**: 205

#### Under-75 mortality rate: cancer
- **England worst**: 103.2
- **25th percentile**: 26.0
- **75th percentile**: 86.7

#### Under-75 mortality rate: respiratory
- **England worst**: 63.5
- **25th percentile**: 20.1
- **75th percentile**: 52.4

#### Life expectancy at age 85
- **England worst**: 83.4
- **25th percentile**: 81.9
- **75th percentile**: 84.7

#### Life expectancy at age 90
- **England worst**: 39.2
- **25th percentile**: 26.0
- **75th percentile**: 57.8

#### Life expectancy at age 95
- **England worst**: 37.4
- **25th percentile**: 22.4
- **75th percentile**: 121.3

#### Life expectancy at age 100
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at age 105
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at age 110
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at age 115
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at age 120
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8

#### Life expectancy at age 125
- **England worst**: 138.8
- **25th percentile**: 9.2
- **75th percentile**: 69.8
